

Market Monitor

The Market Monitor widget functions as a Hotsheet and can be customized to keep current of the activity in your market area. It also keeps track of your listing inventory.

How to Customize Market Monitor

1. Click the **Edit Widget** button on upper-right corner of the widget.

2. Select the desired Filters by clicking on the magnifying glass at the end of each field.

Market Monitor

INTRODUCTION TO MARKET MONITOR
The Market Monitor is an agent-configurable snapshot of current market activity. This widget can be utilized by the Agent to see a visual summary of new Hotsheet matches, price changes, new listings, sold listings, or expired listings that have occurred within 24 hours to 30 days.

FILTERS
Select the filters you wish to apply to the Market and Team sections (if applicable).

Class: RD× RA× MF× LD×

Type:

Area: VBN× VVE× VVW×

Sub-Area/Community:

3. In the *Default Section* drop down list, select which section you wish to be displayed. The general default is **Market** as it displays Hotsheet-style information about your market area.

DEFAULT SECTION
Select which Market Monitor category to display by default.

My Info
Market
Office
Firm

4. In the *Days Back Default* section, select how many days back to include. Keeping it at zero will display all of today's entries.

DAYS BACK DEFAULT
Select the number of days back Market Monitor will use for default. Max is 7 days.
0

5. Click **Save**.
